

Lecture - projector recommended but not needed

# Strip Your Stash

I have been collecting strips since I started quilting. Since then I have designed and published multiple strip patterns and books. I have also designe a ruler called the Stripology ruler which makes stripping so much easier, accurate and efficient. This lecture will take you through my strip collecting process, how I choose strips for my quilts, color combination and choices in scrappy quilts and how to choose background fabrics and accents to pull your scrappy goodness together. I will take you through the thought process behind the Stripology ruler and of course show you multiple strip quilts along the way.
